Bacterial Diseases

*

Key Words: Salmonella, gonorrhoea, sexually-transmitted-disease, symptom, antibiotic, food

DO NOW: Let's do a quiz on what we learnt last lesson. 1□

TIME FOR A

QUIZ!

Quiz:

1. A communicable disease is a disease that can be spread by

2. What disease does the child have?

3. What is

4. What d

5. What n

c) sun refl

6. Why is

7. Describ

8. Describ

9. HIV is a

10. Name

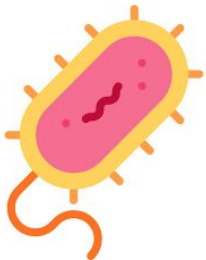

LOb: Understand spread, symptoms and prevention/treatment of bacterial diseases.

Keywords:

Salmonella, gonorrhoea,
sexually-transmitted-disease,
symptom, antibiotic, food

10X

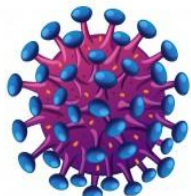

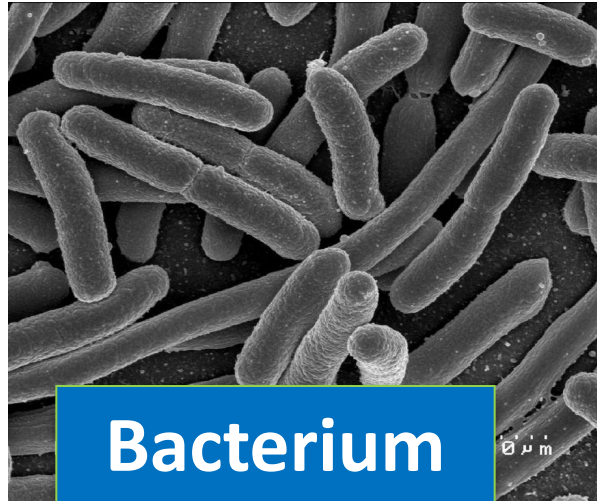

Success Criteria:

- Recall key features of bacteria
- Describe and explain three bacterial diseases
- Practice exam questions

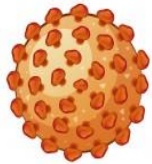

Did you know...
your body has 10x
more bacterial cells
than human cells.

All communicable diseases are caused by pathogens.

Pathogen: Micro-organisms that causes disease

HIV

Hepatitis B

Ebola Virus

Virus

Adenovirus

Influenza

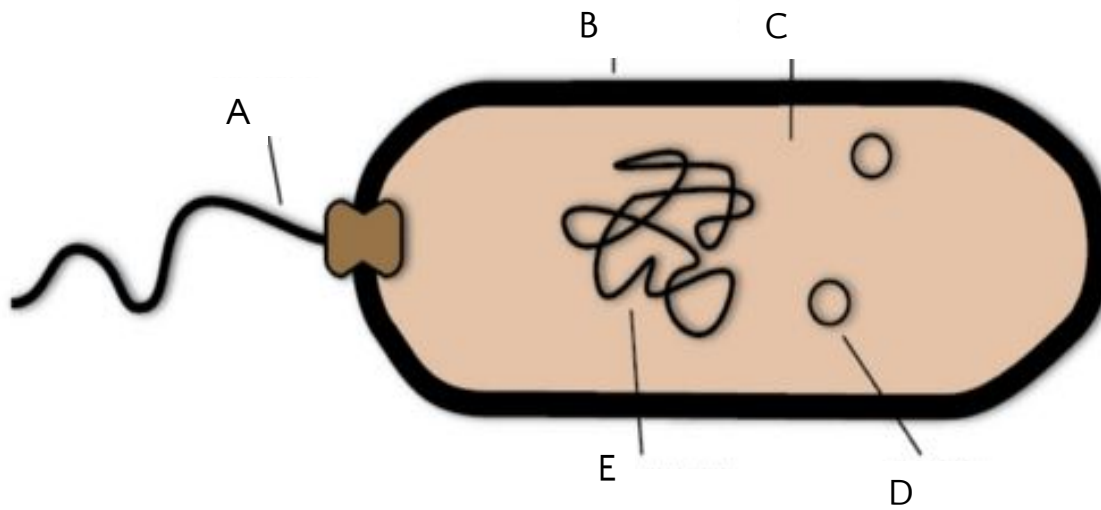

Bacteriophage

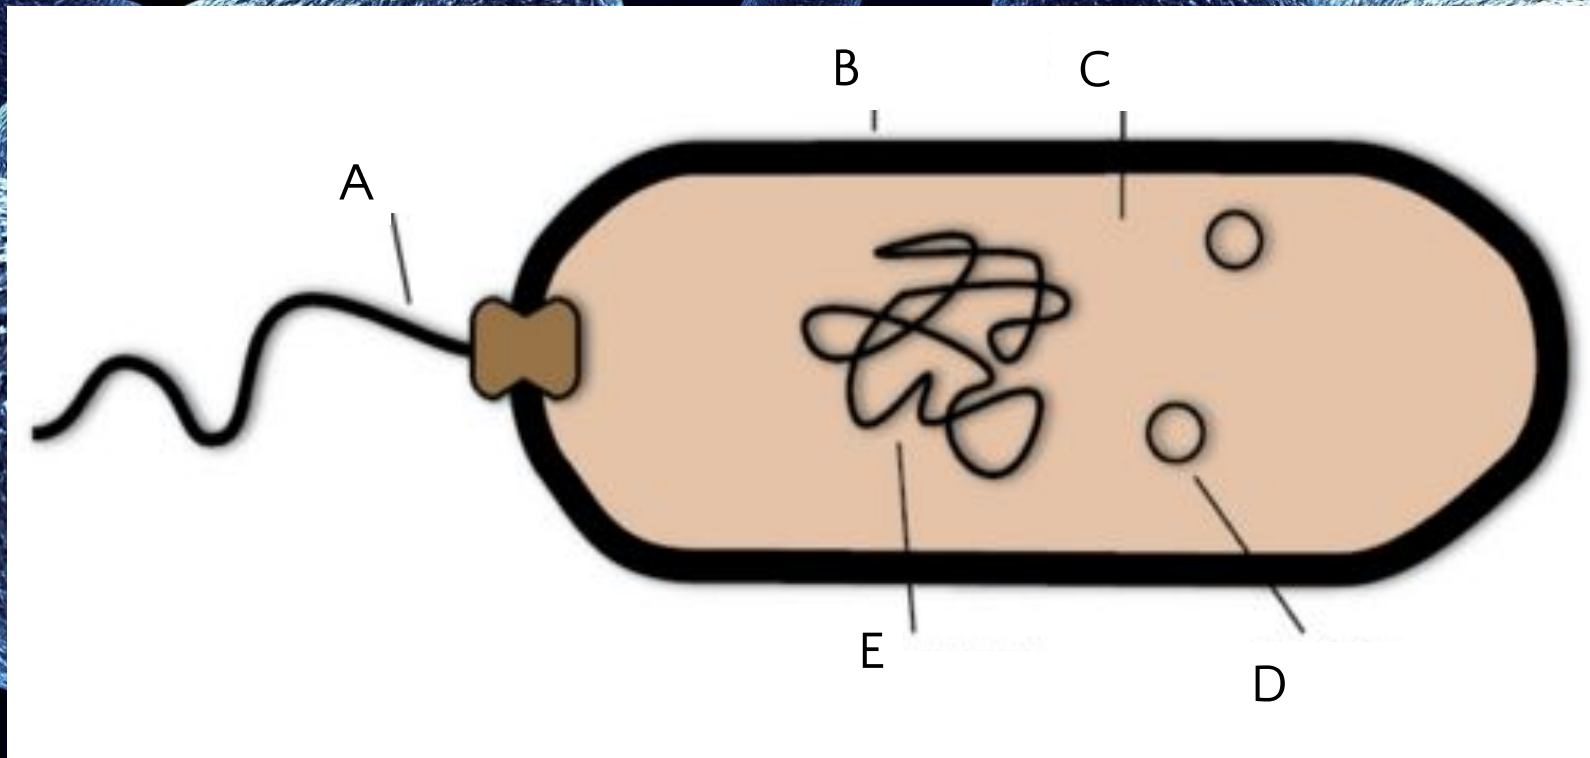

Fungus

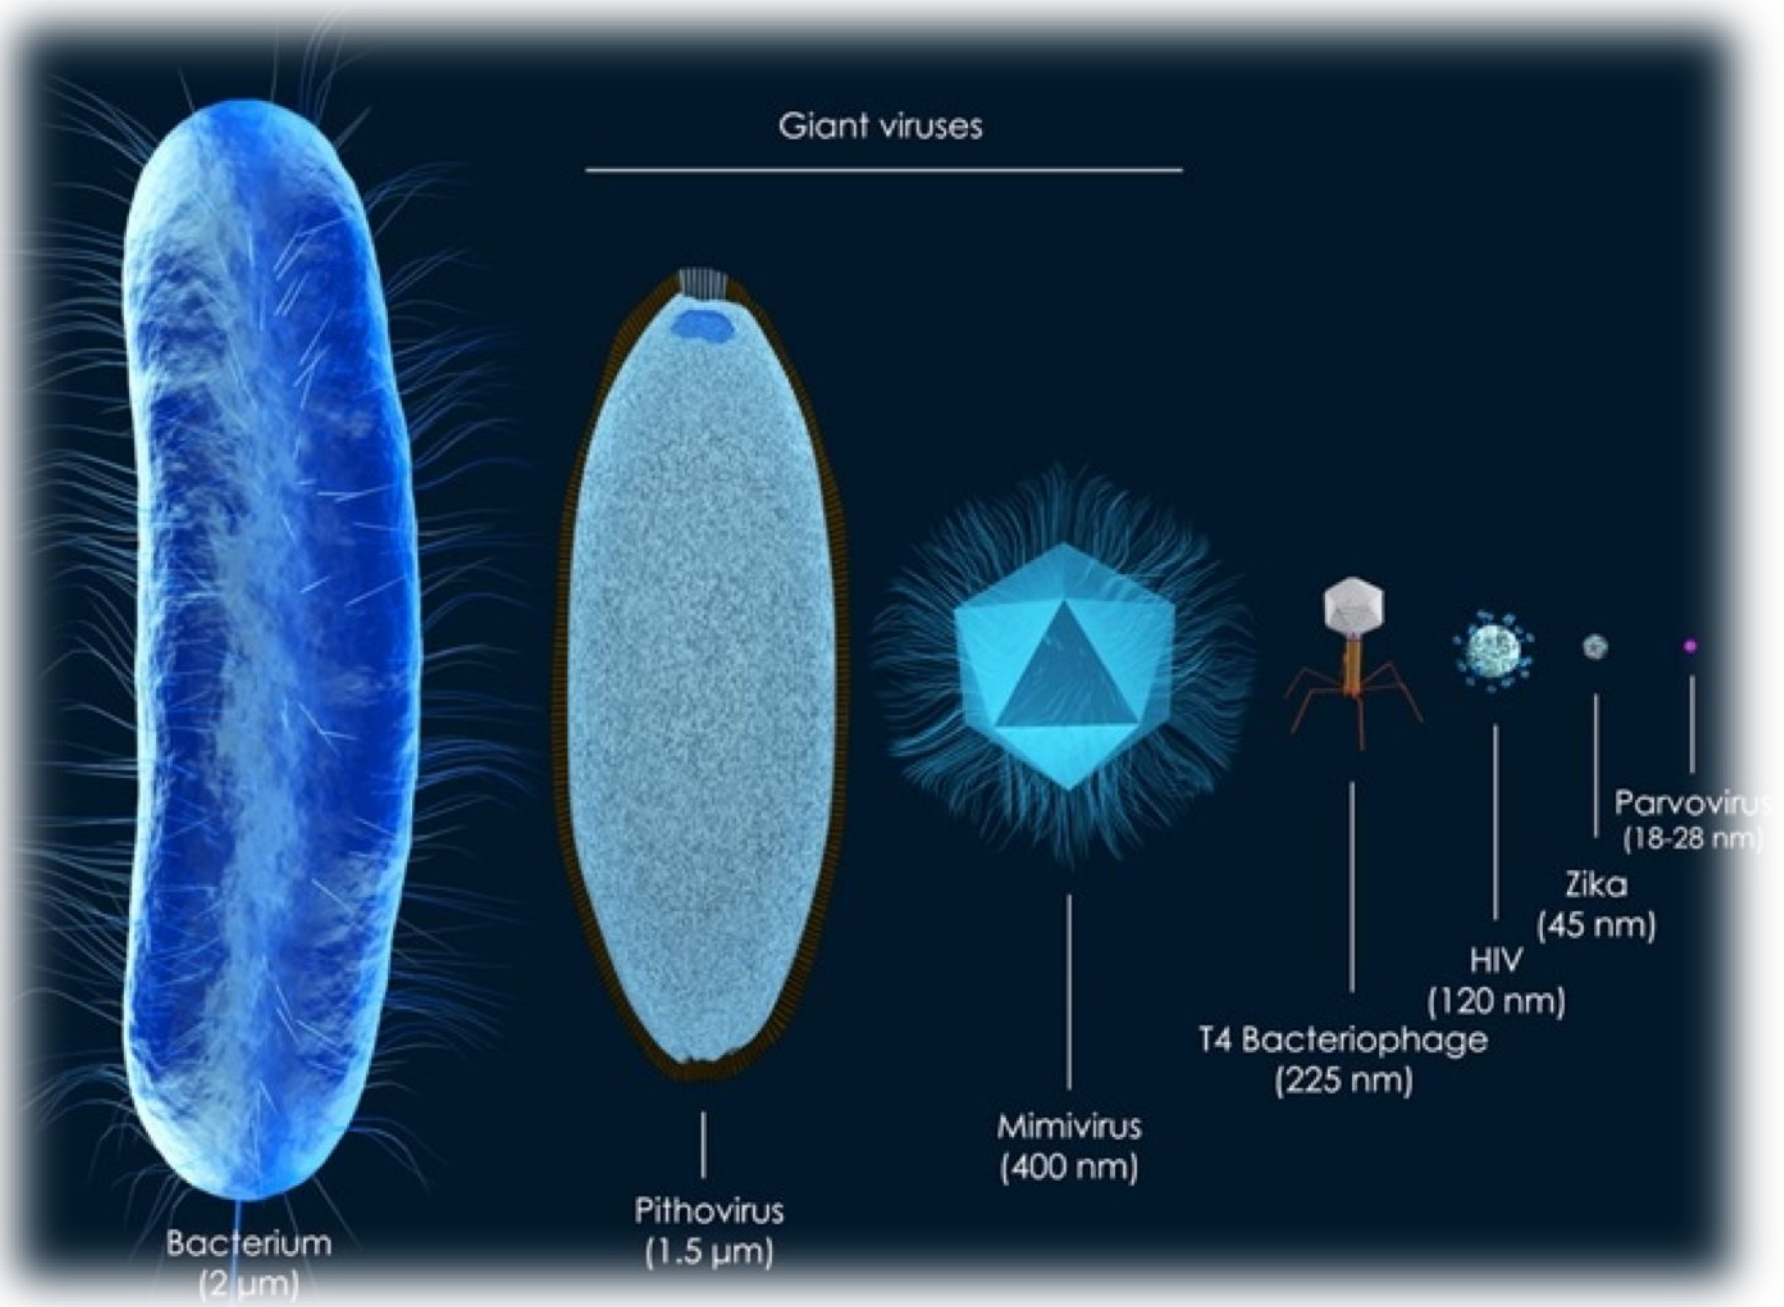

What do you remember about bacteria?

Bacteria are simpler cells than animal or plant cells.
They have **no organelles** or **nucleus**:

Size comparison

Bacteria get past our natural defences and enter our body.

DIVIDE

Bacteria start to divide **rapidly** once inside our body.

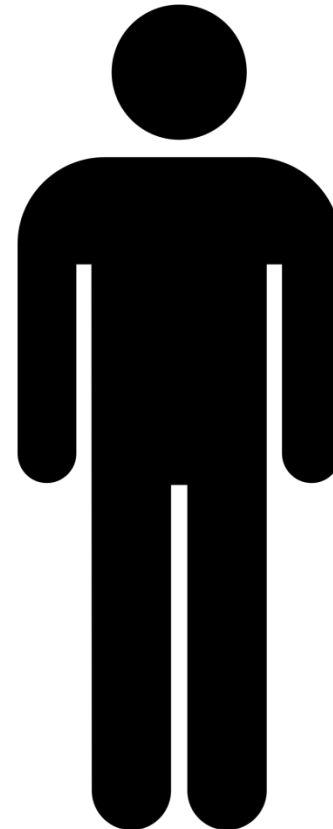

DIVIDE

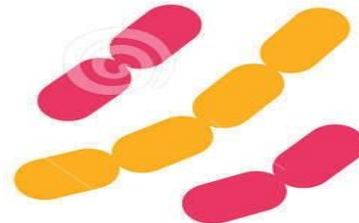

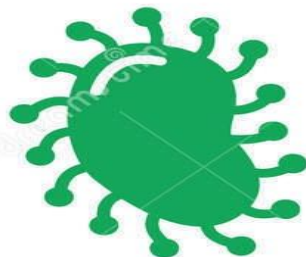

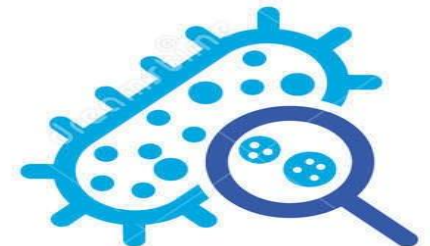

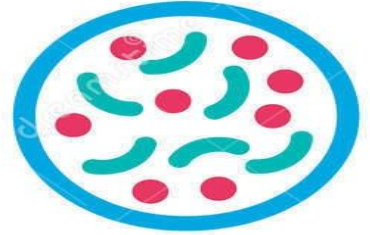

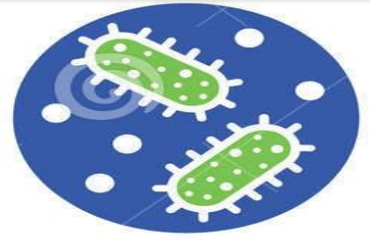

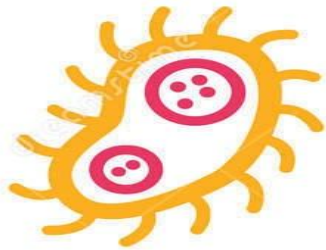

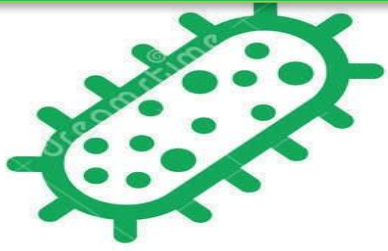

DIVIDE

But why do more bacteria in our body results in us being more sick?

Pathogens release **toxins** into our body which make the body feel unwell.

More bacteria □ More toxins □ More unwell

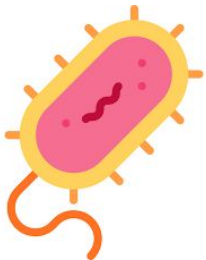

LOb: Understand spread, symptoms and prevention/treatment of bacterial diseases.

Keywords:

Salmonella, gonorrhoea, sexually-transmitted-disease, symptom, antibiotic, food

10X

Success Criteria:

- ✓ Recall key features of bacteria
- Describe and explain three bacterial diseases
- Practice exam questions

Did you know...
your body has 10x
more bacterial cells
than human cells.

Bacterial disease

Salmonella

Gonorrhoea

How is it spread?

Symptoms

How to prevent or treat

Activity: Complete the first column of the table on your sheet for salmonella food poisoning as the video plays.

WATCH AND

LEARN

Pathogen: Bacteria
(*Salmonella Enterica*, *Salmonella typhi*)

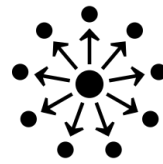

Symptoms: *Typhi* High fever, headache
Rash, stomach ache, bleeding of brain

Non- typhi: Fever nausea, vomiting

Treatment: Antibiotics
Rest
Hydration

Spread: Direct ☐ meat consumption
Indirect ☐ Contamination

Prevention: vaccinate poultry
improved hygiene (hand washing)
improved food preparation

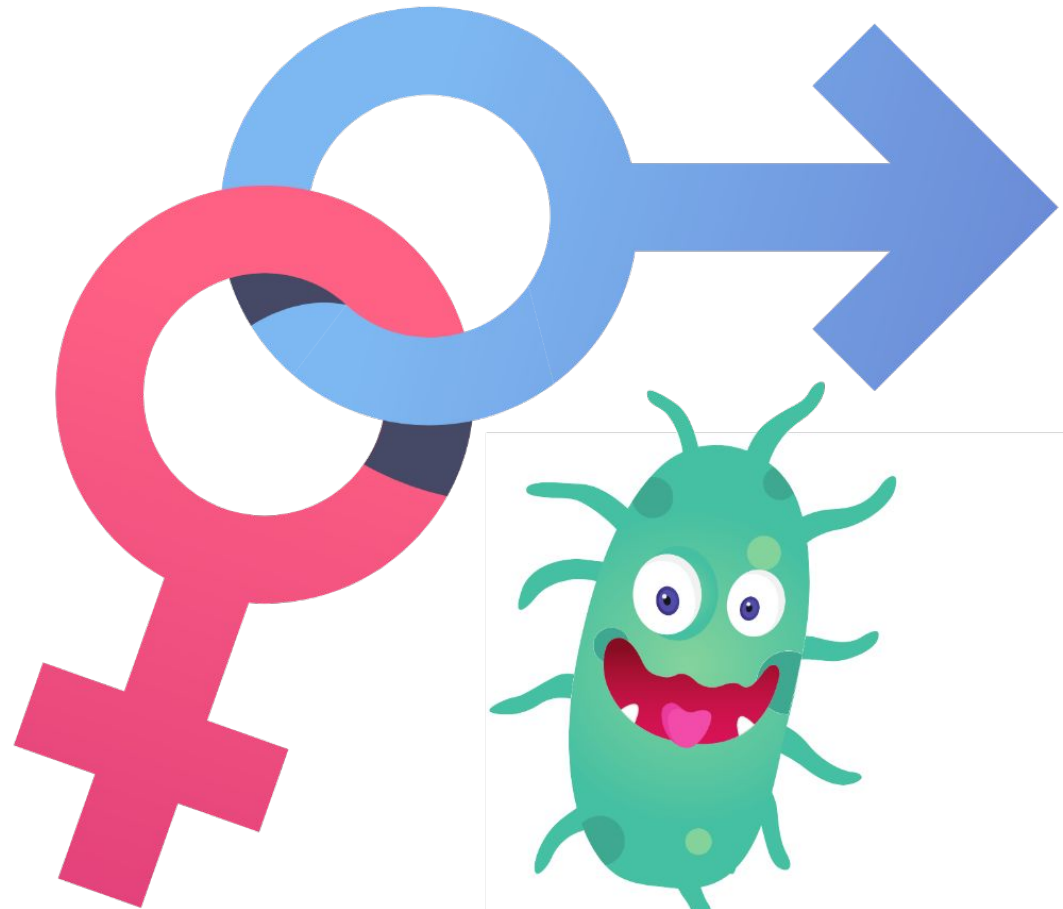

Most at risk: Elderly, weaken immune
System, young

Activity: Complete the first column of the table on your sheet for gonorrhoea as the video plays.

WATCH AND

LEARN

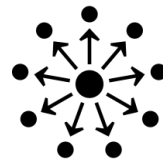

Pathogen: Bacteria
(*Neisseria gonorrhoeae*)

Symptoms: Often
symptomless
Burning sensation when
urinating
Discharge for penis of
vagina
Bleeding between periods

Treatment:
Antibiotics

Spread: Sexually transmitted disease (STD)

Prevention: Condom, one
sexual partner

Most at risk: Young people,
sexually active
With more than one partner

Bacterial disease

Salmonella

Gonorrhoea

How is it spread?

Uncooked food
Contaminated meat

Sexual contact (STD)

Symptoms

Fever, diarrhoea, stomach cramps

Thick yellow/green discharge from reproductive organs

How to prevent or treat

treatment with antibiotics
prevent with vaccinate poultry
improved hygiene

antibiotics
prevent using condoms

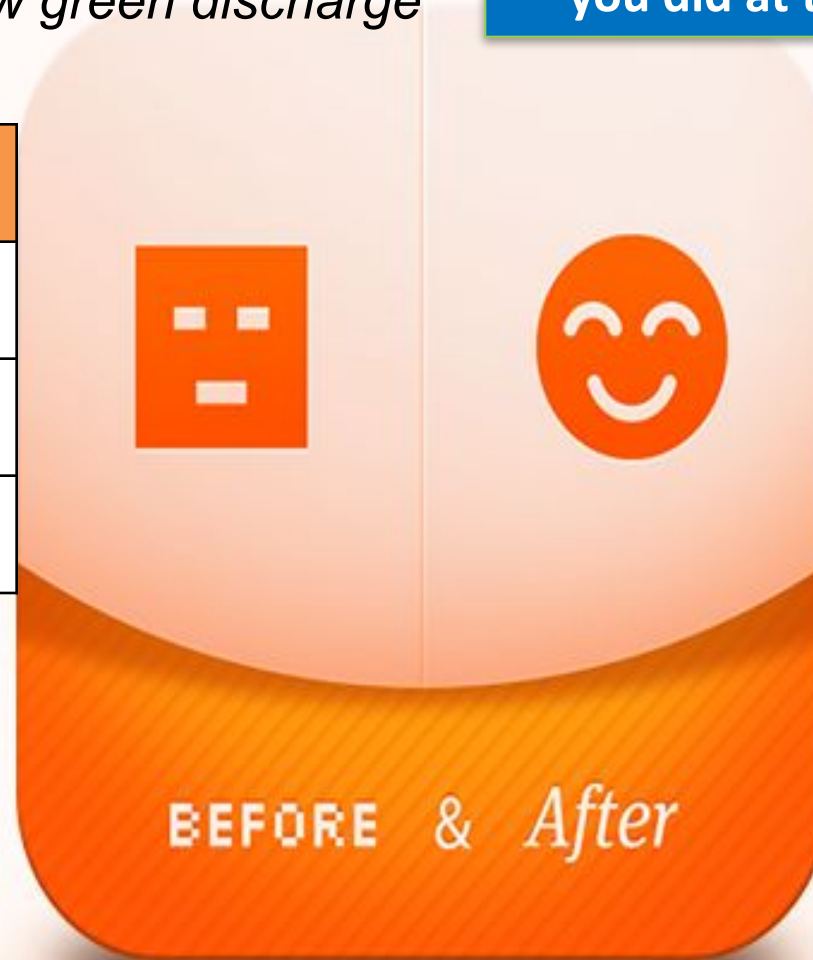

1. *Salmonella: sickness and diarrhoea*
Gonorrhoea: Yellow green discharge

Review: Let's review the answer sheet you did at the start of the lesson.

2.

Bacteria	Virus
Salmonella	HIV
	TMV
Gonorrhoea	Measles

3. *Viruses are much smaller than bacteria*

5. Viruses live inside cells so the antibiotics would not work.

4. *Contaminated food, poor hygiene, under-cooked meat*

- b. *Young people more at risk because*
They are more likely to have sex and
Also more likely to have sex with multiple
partners in shorter periods of time

- c. *antibiotics*

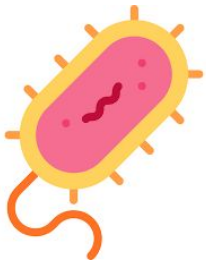

LOb: Understand spread, symptoms and prevention/treatment of bacterial diseases.

Keywords:

Salmonella, gonorrhoea, sexually-transmitted-disease, symptom, antibiotic, food

10X

Success Criteria:

✓ Recall key features of bacteria

✓ Describe and explain three bacterial diseases

□ Practice exam questions

Did you know...

your body has 10x more bacterial cells than human cells.

Activity: Complete the practice exam questions.

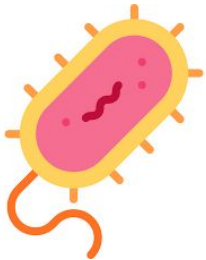

LOb: Understand spread, symptoms and prevention/treatment of bacterial diseases.

Keywords:

Salmonella, gonorrhoea, sexually-transmitted-disease, symptom, antibiotic, food

10x

Success Criteria:

- ✓ Recall key features of bacteria
- ✓ Describe and explain three bacterial diseases
- ✓ Practice exam questions

Did you know...

your body has 10x more bacterial cells than human cells.

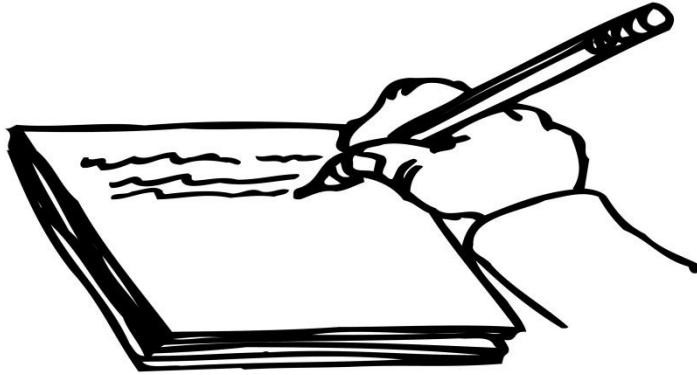

keyfacts

 **Bacteria** are **prokaryotic** having no nucleus. They have circular DNA called **plasmids** and a **cell wall**.

 **Salmonella**: symptoms= fever, stomach cramps. How it spreads: **contaminated food**, uncooked meat, **poor hygiene**. Prevention: **vaccinate chickens**, **good hygiene**

 **Gonorrhoea**: symptoms= thick **yellow/green discharge** from reproductive organs. How it spreads: **STD**. Prevention/treatment: antibiotics

Plenary: Simplify

Firstly write two sentences
to summarise your learning

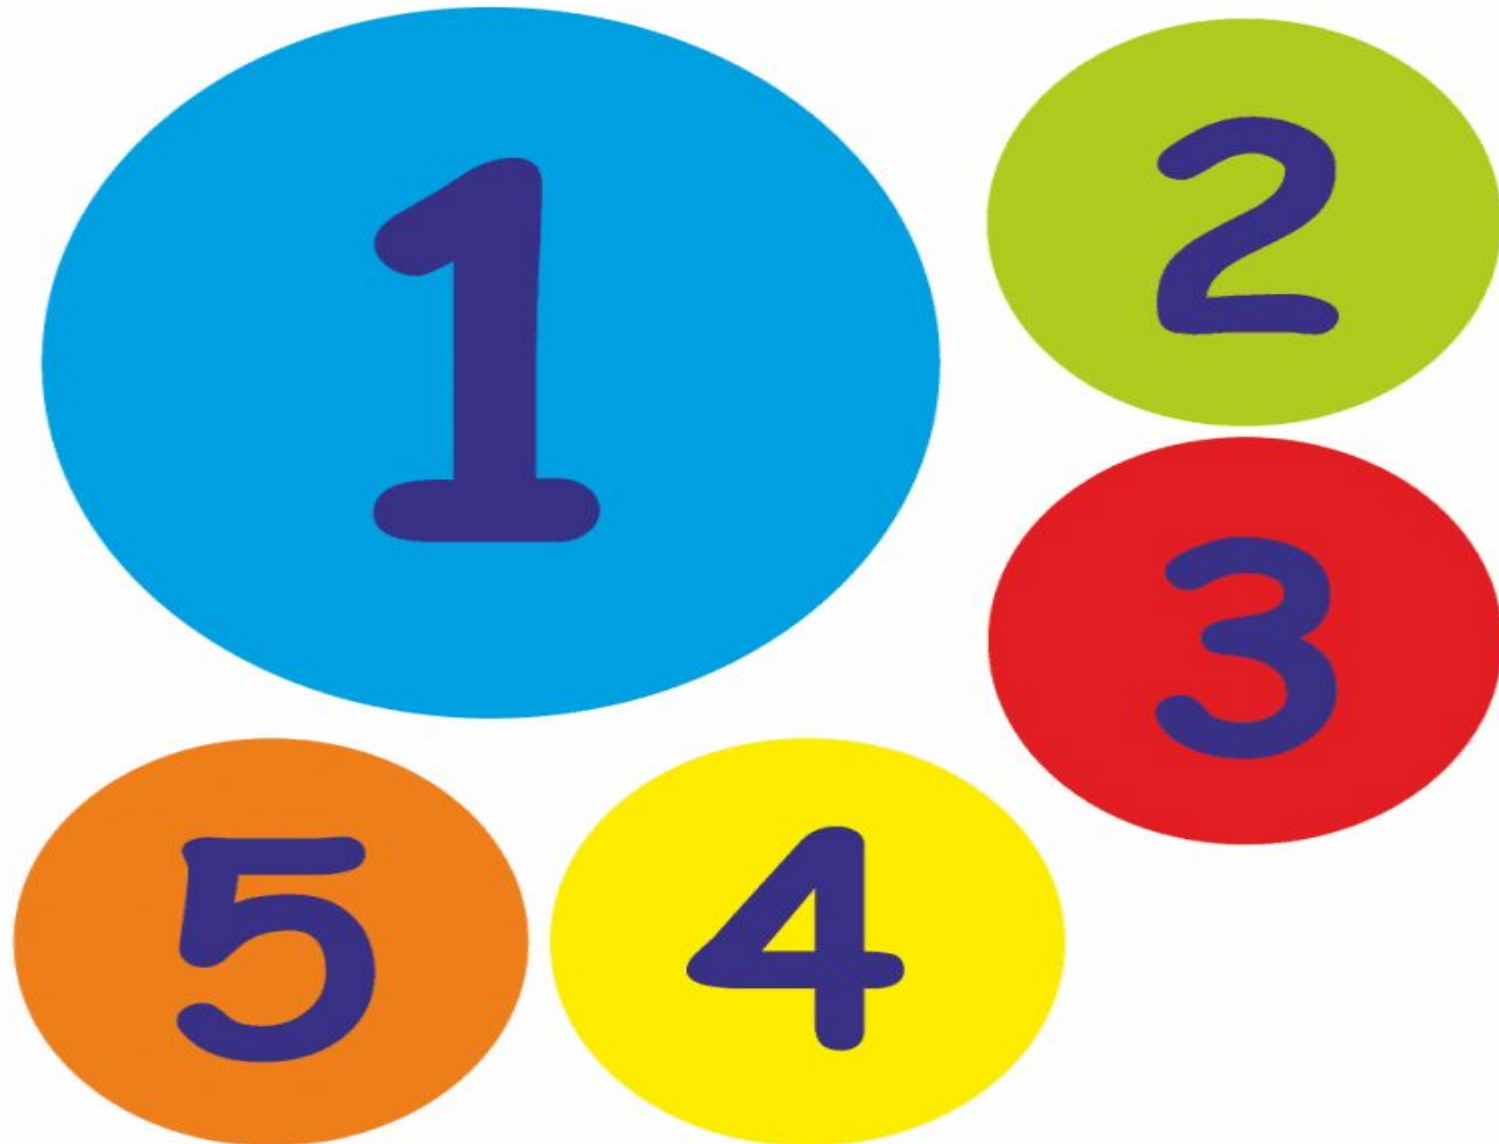

Then reduce to 5 words

Then reduce to 1 keyword

Plenary: Choose a Number One to Five

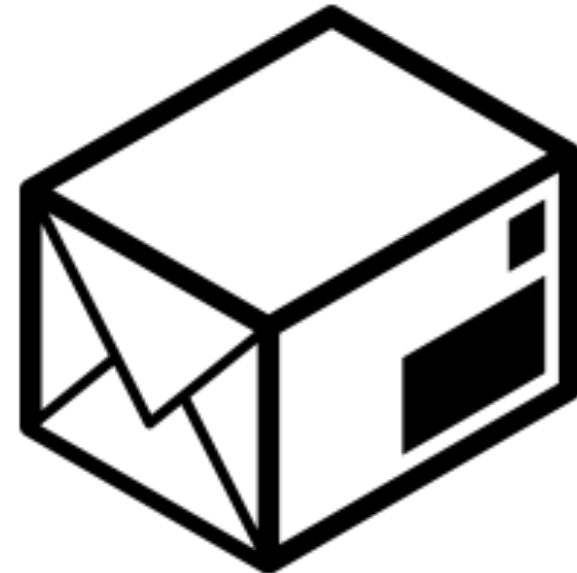

Plenary

Chose a word from the parcel and make a sentence with it.
